

EDUCATION		
•	Motilal Nehru National Institute of Technology	Allahabad
	<i>Bachelor of Technology in Electronics and Communication Engineering;</i>	2023 - 2027
•	D.A.V. Public School	Jamshedpur
	<i>Senior Secondary (CBSE); Percentage: 88.2%</i>	2022-2023
•	D.A.V. Public School	Jamshedpur
	<i>Secondary (CBSE); Percentage: 90%</i>	2020-2021

EXPERIENCE		
•	FreeFlow Advisors	Noida
	<i>Software Engineering Intern – Data & AI</i>	March 2026 - May 2026
	◦ Engineered concurrent web-scraping & OCR pipelines to aggregate data from 250K+ Indian educational institutions	
	◦ Built entity-resolution pipeline via LLM extraction, embeddings, classification to normalize data across heterogeneous sources	
	◦ Developed semantic search & recommendation system via vector search & embeddings for personalized institutional discovery	

ENTREPRENEURIAL EXPERIENCE		
•	RekZon	
	<i>AI recruitment platform - Founding Engineer</i>	
	◦ Engineered LLM-based JD-candidate matching, dynamically weighting extracted requirements to auto-score candidates	
	◦ Built an interview evaluation pipeline using Deepgram STT + Claude Haiku 4.5 scoring for automated assessment	
	◦ Engineered candidate enrichment pipeline using multiple waterfall providers, resolving deduplication & contact intelligence	
	◦ Built vector search infrastructure using pgvector and Supabase, storing candidate embeddings for JD matching	
	◦ Architected an autonomous voice agent using Gemini 2.5 Flash, for recruitment screening & auto-evaluating candidate responses in real time	

PROJECTS		
•	MahabharatGPT Persona-Grounded RAG Chatbot	GitHub Live Demo
	<i>Python, Flask, LangChain, Groq, Pinecone, Hugging Face Embeddings, Docker, NLP</i>	
	◦ Built an end-to-end Retrieval-Augmented Generation (RAG) pipeline in LangChain (LCEL) that grounds LLM responses in a corpus of 27 source books, enabling first-person conversations with 27 distinct Mahabharata personas	
	◦ Engineered an ingestion pipeline that extracts chunks (800-char overlapping segments) and embeds source texts into a Pinecone vector index using 384-dimensional MiniLM sentence-transformer embeddings	
	◦ Designed a name-biased semantic retrieval strategy over a shared vector pool surfacing each character’s relevant passages via top-k cosine search while preserving cross-character context, a deliberate precision/recall trade-off	
	◦ Cut hallucinations by enforcing a grounding-first prompt and returning per-response source-document citations, making every answer traceable to the specific book it came from	
•	StockLabs Real-time Stock Market Tracker with AI Insights	GitHub Live Demo
	<i>React.js, Express.js, MongoDB, WebSockets, Upstox API, YFinance API, REST APIs</i>	
	◦ Built a Node.js pub/sub WebSocket engine using Sets to stream targeted live data, minimizing React re-renders	
	◦ Reduced live market update latency by 40% by implementing WebSocket-driven data pipelines	
	◦ Developed a scalable Node.js backend for financial API aggregation, Upstox OAuth, and data scraping	
	◦ Integrated AI backend services for automated portfolio insights, stock recommendations, and a chatbot	
	◦ Aggregated real-time financial news via RSS feeds, using an in-memory Node cache to minimize API latency	

SKILLS SUMMARY		
•	Languages: C++, C, JavaScript, TypeScript, Python	
•	Full-Stack: React.js, Node.js, Express.js, REST APIs, WebSockets, JWT Authentication, Tailwind CSS	
•	AI / GenAI: LLM Integration, RAG Pipelines, Prompt Engineering, Structured Outputs, LangChain, Vector Embeddings, Semantic Search, HuggingFace, Deepgram STT	
•	Databases: MongoDB, MySQL, PostgreSQL, Pinecone, pgvector (Supabase)	
•	Infrastructure: Docker, Linux, Git, GitHub, Postman, VS Code	
•	Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Complexity Analysis	
•	Backend: Node.js, Express.js, REST APIs, JWT Authentication, WebSockets	

ACHIEVEMENTS		
•	Finalist, Secured 4th position out of 130+ teams in Advitiya Hackathon (IIT Ropar)	
•	Pre-finalist, Smart India Hackathon, among Top 3 in internal Hackathon	
•	2nd Runner-up, 3rd position in Web Development Hackathon under Codesangam (MNNIT)	
•	Semi-finalist, Among top 20 out of 330 teams in Development Hackathon (Jadavpur University)	
•	Global rank 705, Ranked 705 out of 31,000+ participants in leetcode Biweekly Contest	
•	Flipkart Grid 7.0, Qualified for Round 2, placing in the top 10% out of 1.6 lakh+ participants	

CODING PROFILES		
•	LeetCode: Reached Knight tier (1887 rating) with 850+ problems solved.	Link
•	Codeforces: Specialist on Codeforces with a maximum rating of 1416.	Link
